Response Village-Wide

Operational Performance Measure:

To measure the Response Times of first arriving unit according to NFPA 1710. The standard also requires the arrival of an Effective Fire Force (EFF). At this time, we are only tracking the arrival of the

first fire or EMS unit and not the EFF.

Performance Target:

Arrival of crews within 8 minutes according to NFPA 1710 standard, and within 5:20 minutes per ISO Guidelines. (NFPA standard is 90%)

GFD Strategic Priorities:

Provide Quality Emergency Services

Analysis:

The GFD is exceeding response time goals per the NFPA the majority of the time. We have examined the month-to-month trends and determined the issue for underperformance was due to ProPhoenix software issues. This has been addressed with ProPhoenix.

Goals:

Increase towards compliance in comparison to previous months.

Community Risk Reduction

Operational Performance Measure:

Rolling 4 Month Activity:

Analysis:

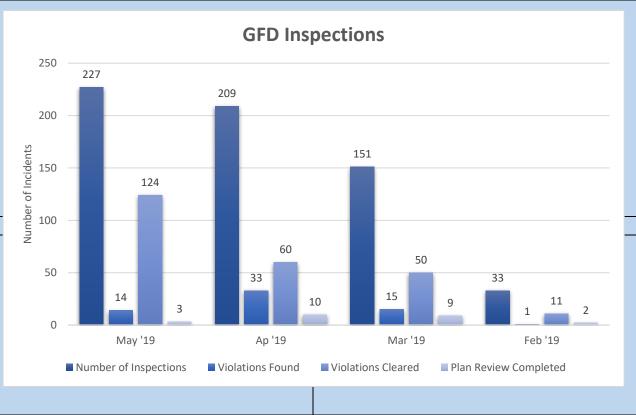

On average, we will need to complete 732 inspections every 6 months. Between the Fire Inspector and the On-Duty fire crew we are on track to meet that goal.

Due to emergency calls, completion of inspections in some months will be less but in the end we will meet our goal.

Performance Target:

Risks in the community are minimized through a proactive Community Risk Reduction system.
